Examination Time Frame: to

INSTRUCTIONS

Description: Examiners must develop and document a methodology used to translate the language documents in the **403_Language_Text_Translation_Challenge2008** folder into English language documents. The translated documents may be returned as files with the original filenames, preceded by **EN_**<original filename.xxx> or may be displayed (written or typed) in full on the answer sheet.

Points will be awarded for the most successfully translated to English document (least errors), provided you supply a detailed methodology of how you derived your findings.

Report the detailed explanation of your process (software or technique) used to determine the original challenge document language and to translate that text to English document text.

Total Weighted Points: 80 Total Points available per entry – Total 400 Points Available

1. **Answers –** Fill in the chart below with your findings. *As a Forensic Challenge, consider that your answers will have to have enough detail for the Findings and Methodology of your examination to satisfy questioning in a court of law.*

2. **Methodology** – Provide a meticulously detailed explanation of your process. Be sure to include a step action that our reviewers can follow to reproduce your work for authenticity including tools and techniques.

Date/Time	Notes

1) Use Microsoft Word 2007 to open the files.
2) Examine each document and copy the text into http://babelfish.yahoo.com
3) Used my personal knowledge of how particular languages are written and selected a translation package
4) Reviewed the results – IF the result was readable in English Proceed to step 5 IF NOT go back to step 3.
5) Test the same copied text in http://translate.google.com (Google has an option to select the input language as "Dialect Language" which helps automate the language determination process)
6) Is the translation from step 2 similar to step 5? IF YES move to step 7, IF NO move to step 1. (In comparing the different free translation engines – I've found that most are coded differently and some reveal more info than others)
7) Test the same copied text into Microsoft Word 2007 and use the internal translation technique (Review → Translate) with the same parameters used in steps 2 and 5. IF the translation is similar to steps 2 and 5 move to step 8. IF NO determine if the changes are acceptable – IF NO then go to step 2.
8) Take all three translations and determine the best translation. Combine translations if necessary.
9) Answer found.

I wrote my paper in the seminar of the "three strikes and you are in the" model, this is all over the history of the United States, it is applied to it reached the Virginia Federation, and was aware of some of the successes and failures. I also estimated that the views of those in Virginia and outside the criminal law system, and draw a conclusion on what the future may bring As for the model and its further use in the state. Internet will be the place where I started my research. By using a different search engine, I found the article had been written on the three strikes policy in the country and their application in the vicinity. The articles from the news media, Crime and Justice Foundation think-tank, and legal information website. These articles help to draw pictures of what to do in the criminal law system on the three-strike style, and they can provide the perspective that it impact on the policy.

My next step will be to build uchreditelstvo my paper, through the study and discuss the history of 3 strikes policy, raised its enactment of 23 provisions of the connection, the main difference is between those provisions and details of policies enacted within the power of the legislature of Virginia. One of the key parts of the legislation, which I will discuss the management act and law enforcement 1994 violent crime and politics that followed around the country. For more information, I will use the database provided that the archive of the University of Norwich, and if necessary, direct contact with the Ministry of Justice Virginia reached Database that can provide information accessible databases of the university identified.

My following the step will cover the perceived successes and failures of models in its 14 year history. To do this, I will use the reviews of specific business situations to illustrate how policies are made to individual criminals, and the results of the application were. To find this information, I will continue to use the database schools, and the information that I can glean through the materials collected from the Ministry of Justice and the Virginia corrections department.

My next step, some of the leading experts in criminal law
system in the country 3 1 week it hit the application of a
model talking about, some of the interest groups in the
future, where legislation to try to map what to show and
explain To withdraw the nation's great to be back in view.
I am of the Commonwealth of Virginia must continue to use
it to that statement of how I feel, or it presents a
possible alternative to the use of a Dodge models hit 3 of
the development of the past 14 years is how to get out
through the papers In fact, to discuss with the conclusion
of my paper, the discussion will be, and complete
conclusion.
Through this paper, the statement I will be a deeper
understanding of the relationship between the federal crime
of national population policies and their different effects
on the development of crime and the show.
Approximately 400 people convicted in Virginia of proven 3
batting villains (3 hours loser) is the time serving under
the law. The regulations in the early 1980s. I swear to the
law for anyone convicted deleted was a strong violation of
the separation of about 3. For the previous 2 hours by
individuals for such crimes to crimes against the service
after being proven guilty, Virginia to life in prison for
the prosecution eoteulgi they can now run, so that was a
low probability.

This annual conference, co-sponsored by the Ministry of Defense and the Center for Online Crimes Task Force - Global Network Operations, The leaders of government and industry together to discuss all aspects of computer crime: entering the investigation of cyber crime law, digital forensics, information assurance, as well as Research and development, testing and evaluation of digital forensic tools. The goal of this year to attend the conference was to share knowledge and processes as well as to address current and emerging threats.
 "This is all a bit of cyber crime conference, and not just the latest information assurance," said Special Agent (retired) Jim Christy, director of futures exploration at the center of the Ministry of Defense in cyber crime. "Offers that change every year to address the current trends and tools.
" Will have hands on the digital forensic training available in two sessions for two days this year. Last year, more than 240 of the 700 attendees took advantage of our hands - on training. Or that the demand

Law enforcement from around the world, anti-information, and information assurance experts from the threat of cyberspace, the growth of our partners to focus on the protection and training to meet for discussions. Cyber crime in the 7th annual meeting in January 2008 Department of Defense 14-18 St. Louis, Missouri in the Renaissance Retain is a magnificent hotel. January 2008 training will be holding 11-14. The main speaker, the Eighth Air Force commander Lt Gen. Robert J. "Bob" Elder, Jr., The Air Force's new Cyber to discuss the establishment of order. The meeting of cyber crime prevention training and execution of many of the features offered by a leader. Conference and exhibition company that features related to the agency. All meetings of the central government, the state is open, and the following work in the field of defense industry infrastructure and civilians from the building contractor of DoD, as well as local law enforcement,: criminal investigator, special agent-to-information
